

DETAILED WEBSITE PRESENTATION

Go Anywhere. Even Where You've Never Been.

A complete, page-by-page tour of the NeverBeen experience — its AI vacation-photo studio, destination guide library, social community, service tools, and access-controlled operations.

REVIEWED 30 SEP 2026

PUBLIC WEBSITE + ROUTE INVENTORY

A two-part destination platform

NeverBeen blends a premium AI vacation-photo request studio with a traveller community. The public site leads from inspiration to a request; the community adds profiles, discussions, support, legal controls, and private operational tools.

33

DESTINATION GUIDE PAGES

61

COLLECTION PHOTOGRAPHS

STUDIO PRICE TIERS

14

HELP ARTICLES / 6 TOPICS

STUDIO

Plan a vacation image collection

Hero storytelling, destination discovery, packages, FAQ, the request form, collection gallery, audience page and founder profile provide the acquisition journey.

GUIDES

Explore destination context

Every supported destination uses one rich guide template: live weather, time, currency, cultural context, practical notes, maps, photographs, related places and a request CTA.

COMMUNITY

Connect with fellow travellers

OAuth entry, member registration, profile areas, message book, help, privacy and terms establish a social-network experience around travel memoirs and galleries.

SCOPE NOTE

This presentation uses the reviewed website, its current client routes, page copy and bundled image assets. Live values and sign-in outcomes can vary at run time; protected administration remains described at a functional level.

One brand, four linked experiences

Primary routes form an inspiration-to-action system, then extend to guides, community participation and staff-only operations.

PUBLIC STUDIO

- Home & sections
- Audience
- Collection
- Founder
- Feedback

DESTINATION LIBRARY

- 33 guide URLs
- Live context
- Maps & practicals
- Photo galleries
- Request CTAs

COMMUNITY & CARE

- Community entry
- Register / Profile
- Message Book
- Help / Legal
- Travel feeds

PRIVATE OPS

- Admin sign-in
- Guarded console
- Members / data
- Announcements
- Health / maintenance

Wayfinding is intentionally cross-linked: the public navigation and footer lead into support, community and collection pages; guides return users to the studio request; legal and Help Centre routes surround account interactions.

Hero, navigation and first decision

The landing page announces the central promise — “Go Anywhere. Even Where You've Never Been.” — and immediately offers a community entry, founder profile, contact jump, destination catalogue, collection and gallery paths.

HOME SECTIONS

- 1 Hero**
Rotating destination image, positioning and direct CTAs.
- 2 How it works**
The four-stage request-and-delivery narrative.
- 3 Destinations**
33 catalogue cards, each opening an individual guide.
- 4 Gallery & pricing**
Example imagery, selectable plans and a contact hand-off.
- 5 FAQ, founder & form**
Trust questions, founding story and lead capture.

A four-step studio process

The section translates the service from a lead form into a human-managed production flow. It also positions verification, editorial refinement and print-ready delivery as parts of the experience.

01 Submit request

Complete the request form with your details, destination preferences and the selected package.

02 Share photos & ID

Supply a clear photo and valid identification for verification and preparation.

03 AI creates the vacation

The studio model places the customer in the requested light, wardrobe and atmosphere; an editor refines the still.

04 Download & share

Receive print-ready photographs for albums, framing and the trip that never happened in person.

“Our studio model places you in destination light, wardrobe, and atmosphere—then an

HOME / HOW IT WORKS

TRUST SIGNALS

The request experience is deliberately framed as a studio service

Site copy links photo ownership, identity verification, signed permission and the option to choose light, wardrobe and season. The FAQ expands those safeguards.

33 cards become a structured guide library

The “Popular Destinations” grid is not a dead-end gallery: every card routes to a dedicated `/destinations/:slug` guide. The catalogue intentionally mixes cities, countries and broad regions.

CATALOGUE COUNT

33 destination routes are enumerated in the appendix, grouped by guide data set.

CARD BEHAVIOUR

Each image card presents country, place and a short travel caption, with an “Explore the guide” link that expands the visitor’s planning context.

Four price tiers, then a tailored brief

Pricing is selectable on the home page and the selected package is carried into the request form. The contact area collects identity and delivery information plus destination and creative notes.

STARTER

₹499

one collection

3 destination looks · 4K files · 48-hour delivery

MOST CHOSEN

ECONOMY CLASS

₹999

per trip

12 looks · portrait & landscape · 24-hour priority

BUSINESS CLASS

₹1999

season

40 looks · private gallery · dedicated editor

FIRST CLASS

₹4999

season

100 looks · creative direction · commercial license

REQUEST FORM

Information captured before the studio responds

Name, email, date of birth, gender, country, package, international phone number, destination and a free-text note for creative direction (for example: light, wardrobe or season).

HAND-OFF

A short path from inspiration to a collection brief

Pricing plan → Home contact form → team follow-up → photo and ID verification → production. A successful submission confirms that the first look will be sent back.

Trust-building sections complete the landing page

The lower page supplies an example gallery, an accordion FAQ, a founder teaser, the request form and a footer that exposes service, visit and support navigation.

GALLERY

A 14-item editorial travel mosaic on the page acts as aesthetic proof of the requested style.

FAQ

16 practical answers

Topics cover suitable uploads, realism, sharing and printing, timing, submission process, outfit limits, celebrity policy, consent, ID verification, payment, refunds and deletion after the contract.

FOUNDER TEASER

Kingshuk

The home page introduces the founder with a short statement and links onward to the request form.

FOOTER

Service + support cross-links

Studio: How It Works, Destinations, Audience, Collection, Pricing. Visit: Gallery, Contact, Admin. Support: Help, Privacy, Terms and Community.

One deep template, 33 localized pages

Every guide uses the same reusable component. A landmark-style hero supplies the place, region, time zone, currency and best-time information before the visitor enters live and editorial sections.

LIVE

Weather · local clock · currency rate

OVERVIEW

Summary · Wikipedia context · facts

DISCOVER

Where to eat · sights · history · geography

MAP

Coordinates · Google Maps · photo search

PLAN

Culture · seasons · transport · practical notes

VISUALS

Photographs · related places · service CTA

Never been to [destination]? Send us a portrait you already own.

GUIDE CTA BAND

Guide navigation uses anchor links so a reader can jump through the long-form page. Invalid slugs receive a friendly “Off the map” state with the full available guide list.

The guide pairs inspirational content with travel-planning context

Live cards are designed to be useful even when a source cannot return data: the interface shows loading/unavailable states and leaves seasonal and practical guidance visible.

RIGHT NOW

Live from a destination

- ✓ Current weather and multi-day forecast
- ✓ Local clock, date and relative offset
- ✓ Currency and reference cross-rates

LOCAL CONTEXT

At-a-glance planning data

- ✓ Country, region, time zone and coordinates
- ✓ Best time, currency and custom practical facts
- ✓ Map + Google links for discovery

EDITORIAL DEPTH

Culture and place knowledge

Overview, food recommendations, landmark lists, history, geography and culture establish why a destination matters rather than only presenting backdrop imagery.

VISIT PLANNING

Actionable seasonal guidance

Season cards, getting-around text, travel facts and “Did you know?” prompts support a more complete planning mindset before returning to a NeverBeen request.

Live sources named in the guide: Open-Meteo for weather, Frankfurter / ECB reference rates for currency, Wikipedia for supplemental extracts, and an embedded map with outbound Google Maps / image-search links.

12 guide routes in the Europe data set

Each destination appears as a unique URL but shares the complete guide structure shown in the prior slides. Route slugs make this coverage indexable and easy to link from the catalogue.

 Paris /destinations/paris	 Switzerland /destinations/switzerland	 Norway /destinations/norway
 Santorini /destinations/santorini	 Rome /destinations/rome	 London /destinations/london
 Reykjavik /destinations/reykjavik	 Istanbul /destinations/istanbul	 Netherlands /destinations/netherlands
 Austria /destinations/austria	 Denmark /destinations/denmark	 Finland /destinations/finland

EUROPE COVERAGE

From Paris and Rome to the Nordic guides, the index balances individual cities, countries and thematic destinations. Guide pages surface their own photos and rotate recommendations for further exploration.

Five guide routes in the Africa / Middle East data set

These routes retain the same long-form planning and live-data experience while allowing country- and region-specific content, currency and time-zone context.

Marrakech

Morocco · </destinations/marrakech>

Cape Town

South Africa · </destinations/cape-town>

Egypt

Egypt · </destinations/egypt>

Serengeti

Tanzania · </destinations/serengeti>

Dubai

United Arab Emirates · </destinations/dubai>

REGIONAL CONTEXT

Curated templates scale without flattening place

The structured content fields let each guide carry its own restaurants, sights, historical framing, seasonal notes, practical data and “Did you know?” facts while preserving consistent wayfinding.

Africa & Middle East guide coverage: Marrakech, Cape Town, Egypt, Serengeti and Dubai.

16 guide routes in the Asia Pacific / Americas data set

Together with Europe and Africa / Middle East, this set completes the 33-supported-destination inventory. Individual guide pages can have dynamic values but share the same core editorial sections.

● Tokyo	● Seoul	● New Zealand	● Machu Picchu
● Antarctica	● Canada	● United States	● Maldives
● Thailand	● Malaysia	● Singapore	● Indonesia
● Australia	● Japan	● Korea	● Brazil

The guide library keeps the initial visual dream intact, then adds useful local details, planning guidance, maps and a route

DESTINATION EXPERIENCE

COVERAGE NOTE

Cards and guides are separately useful

The home catalogue is optimized for browsing. The guide page is optimized for deeper understanding and planning — a reusable content pattern rather than a static landing card.

“Made for moments that matter”

The `/audience` page explains whom NeverBeen serves, makes an inclusive age promise, identifies seven core use cases, lists popular places and turns privacy commitments into six written promises.

Closing CTA: “Where have you never been?” with routes back to the home request and pricing sections.

SEVEN REASONS PEOPLE COME

- Couples
- Families
- Birthday gifts
- Social media show-offs
- Dream destinations
- Content creators
- Old folks

SIX WRITTEN PROMISES

Permission and handling are central, not decorative

The page names ownership / permission, no deceptive documents or impersonation, service-only processing, customer control, photo verification and a signed model-release agreement.

A scrollable wall of 61 travel-photo moments

The `/collection` page positions the image library as a phone-like gallery of honeymoons, reunions, birthdays and horizons. Tiles open into a lightbox; the collection is grouped into albums when an album heading is present.

GALLERY BEHAVIOUR

- ✓ Photo tiles are labelled with title and accessible description.
- ✓ Tap / click opens a modal dialog with caption and position.
- ✓ Previous / next arrows browse without leaving the collection.
- ✓ Tap outside or choose Close to return to the image wall.

CONTENT PIPELINE

Drop-in image collection

The project generates a photo manifest from `/public/collection`; folder names can become album headings and a captions file can override image labels. The page never needs to be blank because it can fall back to audience imagery.

CLOSING MESSAGE

"Your photograph can belong in this collection." The closing CTA routes to Create my vacation or the audience page.

A profile of the platform creator

The `/founder` page gives the brand a named author: Kingshuk, presented as a Senior Software Engineer and founder of NeverBeen, followed by background facts and an extensive expertise inventory.

FOUNDER DETAILS

Kingshuk

Senior Software Engineer and founder of NeverBeen

The profile combines a creator statement with experience in software development, requirements and database modelling, application architecture, and customer-facing delivery.

BIOGRAPHICAL FACTS

Nationality, gender, date of birth and education

The page includes Indian nationality, male gender, date of birth, and a B.Tech in Computer Science and Engineering from Heritage Institute of Technology, Kolkata.

EXPERTISE GRID

Nine engineering / technology domains

Architecture & development; frontend; database; integration & testing; cloud & version control; tools & IDE; services / APIs; performance tuning; and artificial intelligence.

“

“I believe in Creativity, Future Proof Design and Strong Foundation in Programming.”

FOUNDER PROFILE

A searchable “Trending Destinations News” board

The `/travel-feeds` page gives users a live-feed-shaped destination search. It combines destination context, source-status reporting, category-labelled articles, open-licensed photography, a rotating trends board, and compact flight / hotel search modals.

SEARCH RESULT

A destination profile plus sources

A searched place can show a summary, weather, public-feed articles grouped as Travel, Weather, News, Sports, Culture or Local, Commons photography and a source-status list.

TRENDS BOARD

Auto-refresh UI every 30 seconds

The idle state ranks destinations, displays reads and weather when available, and lets a visitor use a trend card as a search shortcut. The board paginates 12 seeded entries in groups of three.

The page also provides “Plan your trip” cards. Flight and hotel forms use a Skyscanner-style interface and generate sample options within the page rather than completing a booking transaction.

A direct studio-feedback channel

The `/feedback` page asks for appreciation, testimonials, improvement ideas, queries, grievances and reviews. It uses a validated form and prepares a prefilled WhatsApp message instead of publishing feedback publicly.

INTAKE

What the visitor can submit

Name, email, a required feedback type, and required notes. The notes field presents a visible character counter and limit state; the page asks for request reference, order date, destination/package and helpful screenshots.

ROUTING

What happens on submit

When the form is valid, a new WhatsApp tab is opened with the message ready to send. A success state recaps the sender, email and feedback type and offers a direct link if a browser blocked the popup.

SERVICE STANDARD

How response is framed

The page says urgent queries and grievances are prioritized, usually within a working day. It also links to the home contact form, FAQ and founder profile for alternate paths.

“Nothing is posted publicly, and no account is created.”

FEEDBACK / SUBMIT NOTE

Searchable answers across six community topics

The `/help` page is a knowledge base with a photographic hero, free-text search, popular-query shortcuts, category filters, accordion results, context links and a route back to the community sign-in.

SIDEBAR PATHS

Contact support · FAQ · Privacy Policy · Terms & Condition · Community sign-in · Founder.

Site translation

ARTICLE LIBRARY

14 entries with filter and accordion behavior

Answers cover joining, profile basics, Google/Facebook sign-in, session expiry, Message Book, reporting, memoirs, galleries, privacy, account deletion, language switching, translation fallbacks, browser support and human contact.

“Your memories stay yours”

The `/privacy` page treats privacy as part of the community product. A hero, three high-level promises and a sticky on-page table of contents lead to eight plain-language sections.

LEGAL PRESENTATION

Hero chips describe a plain-language summary and GDPR / CCPA friendly positioning. The page routes to Help Centre or Feedback for specific requests.

01 Information collected

02 How information is used

03 Photographs & memoirs

04 Cookies & tokens

05 When data is shared

06 Member rights

07 Security

08 Contact / requests

STATED CONTROLS

No sale of personal information; user controls

Highlights name encrypted authentication, no broker / data sale, and account-level abilities to download or delete a profile, memoirs and galleries. The page says image deletion ends the hosting licence and rolling backups expire within 30 days.

“The rules of the trail”

The `/terms` page is a human-readable community agreement. A trail-themed hero, three short agreements and a table of contents introduce nine legal and behavioural sections.

SHORT VERSION

Be genuine

One honest member; no fake engagement or bots.

SHORT VERSION

Share your own

Post content you have the right to share.

SHORT VERSION

Keep it hospitable

No harassment, spam or hostile behaviour.

1. Acceptance • 2. Account • 3. Acceptable use • 4. Your content • 5. Plans & billing • 6. NeverBeen rights • 7. Termination • 8. Disclaimers • 9. Governing law / contact

KEY MODEL

Core community features are described as free; optional paid studio plans are governed by the displayed checkout terms. The page defines account conduct, content ownership/licence, moderation, account closure and legal contact routes.

Connect account

The `/community` root is a community-specific shell whose default page is a compact sign-in / connection card. It deliberately replaces the main marketing header with social shortcuts and a theme-picker slot.

ENTRY PAGE FEATURES

- Language selector designed to translate the full site, with the setting remembered for future visits.
- Provider buttons are content-managed and can show loading and manual-provider help states.
- Security footnote states that authentication is encrypted and secure.

NEVERBEEN COMMUNITY

Connect with travellers

Choose a secure identity provider path, explore as a guest, or use the visible new/existing-member simulation selector when enabled.

G Continue with Google

Guest option: browse community content without an account. Footer: Privacy · Terms & Condition · Help · Return to NeverBeen Home.

COMMUNITY HEADER

- Back-to-site brand link.
- Traveller / circle search on wide screens.
- Journey, notifications and messenger shortcuts.
- Theme picker at upper right.

A verified member profile starts with a required form

The `/community/register` route uses a responsive travel-scene background. The registration card asks for a small portrait and mandatory identity / geography fields before creating a NeverBeen account.

NEW MEMBER REGISTRATION

Create NeverBeen Account

Profile photo · name · surname · email · country → state
→ city · gender · date of birth

CREATE NEVERBEEN ACCOUNT →

Free forever · Verified community · your photo stays private until approved

PHOTO RULE

Portrait upload is required

The screen accepts JPEG / PNG / JPG and explicitly presents a 200 KB maximum for the initial community profile photograph.

CASCADE

Location selections are progressive

Country drives the state list; state drives the city list. The page shows supporting guidance before each dependent list is available.

FORM BEHAVIOUR

Inline validation and submission state

All fields are required. Invalid fields display specific guidance; the primary button changes to "Creating Account..." while submission is active.

A multi-tool member dashboard

The community profile is the densest application screen. It combines a search surface, a personal side panel, a wide functional area, visitor-view modes and responsive mobile navigation.

PERSONAL IDENTITY

Cover, avatar, profile state and quick stats

The sidebar supports cover / avatar changes, active-status selection, companion / circle / journey-post counts, follower counts, a public-or-locked profile pill and a visitor-preview action.

SOCIAL NAVIGATION

Eleven application sections

About me, Journey, Gallery, Games, Message Book, Companions, Circles, Followers, Messenger, Notifications and Settings are presented as section controls in the profile interface.

Top-level profile search is designed for travellers, companions and circles. On mobile, navigation becomes a hamburger-triggered drawer; the interface preserves avatar access and the current profile section in the compact header.

A shared discussion stream with replies and reactions

The `/community/message-book` route is the public community guestbook. Guests may read, while authenticated members can post, reply, react and delete their own contributions.

NEVERBEEN COMMUNITY

Community Message Book

Share your travel experiences, questions, or tips...

POST TO MESSAGE BOOK

Verified Traveler
A destination tip, experience or question appears here as a threaded discussion item.

Like · Dislike · Reply

GUEST MODE

Readable without authentication

An unauthenticated composer becomes an invitation to connect. The page promises that visitors can read messages freely and need an account to post, comment, reply or react.

POST MODEL

Threaded, attributed and controllable

Cards include author avatar, name, optional profession, time, post text, reaction counts, reply count and nested reply composer. A hover card can preview a member profile.

The composer enforces a 2,000-character limit. Post actions remain conditional on authentication and ownership.

OAuth callback, themes, language and support routes

Not all community routes are content pages. Several protect the flow between identity-provider authentication, registration, profile completion, visual personalisation and self-service support.

OAUTH CALLBACK

/community/callback

Shows a connecting / validating state; exchanges the provider code with the application; then redirects a complete profile to Community Profile or a new member to Registration. An error state returns to Connect.

THEME SYSTEM

Community theme picker

The community header includes a theme-picker slot. The project ships a broad theme collection — travel classic, mountain escape, ocean breeze, city explorer and many playful themed scenes.

LANGUAGE

Site translation selector

The sign-in card can expose a multilingual dropdown. Help documentation says the selection translates navigation, pages and footer and preserves the choice; fallback English remains if the translation service is unavailable.

ALIAS ROUTES

Shortcuts and redirects

The app exposes `/profile` as a direct profile page, supports `/community/profile`, and redirects `/community/messages` to `/community/message-book` so conversations retain one canonical destination.

SUPPORT NET

Legal and help surround participation

The community sign-in footer links Privacy, Terms & Condition and Help. Support pages cross-link back to community sign-in, Feedback and founder information instead of stranding the visitor.

FLOW PRINCIPLE

Authentication is designed as an explicit stateful journey: entry → provider → callback → register or profile → discussions and personal spaces.

Restricted administration and volunteer intake

The `/login` route is not a public customer login. It is an Admin Console sign-in page with a separate “Join as a Volunteer Admin” application path. The admin route tree is guarded and redirects unauthenticated users here.

VOLUNTEER PATH

Application instead of access

The alternate view requires full name, email, a strong password and a resume attachment (PDF, DOC or DOCX, with the page showing a 2 MB maximum). A confirmation view promises review in 5–7 business days.

NEVERBEEN ADMINISTRATION

Admin Console

Restricted access for administrators — manage members, travel galleries, content and community operations.

SIGN IN TO ADMIN CONSOLE

GUARD

Unauthenticated admin URLs do not expose tools

The admin route configuration checks an AdminAuthService state. If the visitor is not authenticated, navigation to `/admin` and its child routes resolves to `/login`.

A guarded operations suite behind `/admin`

The detailed internal interface is access-controlled, but its route map shows the operational scope of the application. This slide records the modules rather than presenting protected customer data.

DASHBOARD & SAFETY

- Dashboard
- All / verified / online members
- Abuse reports
- Identity checks
- Identity document viewer

COMMUNICATIONS

- Mail inbox / sent / compose
- Announcements
- Announcement composer
- WhatsApp dock

USER & DATA

- Users
- Data management
- Backup / restore
- Data explorer
- Privacy requests

SITE OPERATIONS

- Website management
- Maintenance
- Health dashboard
- Health report
- Repositories placeholder

Admin child routes also route to a full-page health report and a secure identity-document viewer. Unknown admin paths return to the dashboard. The route tree explicitly marks Repositories as not built yet.

A warm travel-editorial system with responsive behavior

The application centralises a distinctive palette — paper / sand, forest, bronze and gold — and uses serif display type, a clean sans-serif body font, rounded controls, photographs and content cards to carry the brand across very different pages.

MARKETING NAV

- ✓ Brand logo → Home
- ✓ Route / fragment links
- ✓ Menu collapses on smaller screens
- ✓ Active link styling
- ✓ Footer mirrors service, visit, support

CORE TOKENS

-  Sand
-  Paper
-  Forest
-  Bronze
-  Gold

COMMUNITY NAV

- ✓ Distinct community header
- ✓ Desktop community search
- ✓ Journey / notifications / messenger
- ✓ Theme picker
- ✓ Mobile page-level navigation

CONTENT CONFIGURATION

Home sections and some navigation / copy are CMS-aware

Home section ordering / visibility, hero buttons, footer columns, FAQ and pricing records are accessed through a site-configuration service. This provides editorial control without changing the page scaffolding.

How the pages work together

The strongest way to understand the website is as three linked journeys: commissioning a creative service, researching a dream location and joining a moderated travel community.

STUDIO REQUEST

DESTINATION DISCOVERY

COMMUNITY PARTICIPATION

“Where have you never been?” connects all three journeys.

CROSS-SITE CTA

Named pages and canonical locations

This index lists all main page routes included in the presentation. Child / alias / redirect routes and the destination-library variants are listed on the following slides.

/

Home — hero, process, destinations, gallery, pricing, FAQ, founder, contact

/audience

Audience — use cases, age statement, places and permission promises

/collection

Collection — 61-image tile gallery / modal viewer

/founder

Founder — profile, biography and expertise

/destinations/:slug

Destination guide template — 33 supported instances

/travel-feeds

Destination news, source status, trends and trip-search modals

/feedback

WhatsApp-prepared feedback and support form

/help

Searchable Help Centre — 14 articles across six categories

/privacy

Privacy Policy — eight sections and rights controls

/terms

Terms & Condition — nine sections and conduct rules

SCOPE

The global marketing navbar and footer supply the primary cross-links across this group; route-specific back links keep deep pages connected to either Home or Community.

Entry states, child pages, aliases and operations

The application distinguishes visitor-facing community states from internal administration. The latter is covered for completeness but requires successful admin authentication.

/community

Community Connect — default community root page

/community/register

New member registration

/community/profile

Member dashboard / social profile

/profile

Direct profile route / same profile feature

/community/message-book

Community discussion stream

/community/messages

Redirects to Message Book

/community/callback

OAuth exchange / stateful redirect page

/login

Admin Console sign-in + volunteer application

/admin

Protected Admin Console — child modules

/admin/health-report

Protected print-ready health report

AUTHENTICATION BOUNDARY

`/admin` and its children use an authentication guard. An unauthenticated request is redirected to `/login`; this presentation therefore records the visible purpose and route structure of protected tools rather than exposing data from them.

All 33 guide routes grouped by data source

The landing-page card catalogue and guide route data are aligned: every listed place has a corresponding guide slug. This is the complete content inventory at review time.

EUROPE (12)			AFRICA + MIDDLE EAST (5)			ASIA PACIFIC + AMERICAS (16)		
● Paris	/destinations/paris		● Marrakech	/destinations/marrakech		● Tokyo	/destinations/tokyo	
● Switzerland	/destinations/switzerland		● Cape Town	/destinations/cape-town		● Seoul	/destinations/seoul	
● Norway	/destinations/norway		● Egypt	/destinations/egypt		● New Zealand	/destinations/new-zealand	
● Santorini	/destinations/santorini		● Serengeti	/destinations/serengeti		● Machu Picchu	/destinations/machu-picchu	
● Rome	/destinations/rome		● Dubai	/destinations/dubai		● Antarctica	/destinations/antarctica	
● London	/destinations/london					● Canada	/destinations/canada	
● Reykjavik	/destinations/reykjavik					● United States	/destinations/united-states	
● Istanbul	/destinations/istanbul					● Maldives	/destinations/maldives	
● Netherlands	/destinations/netherlands					● Thailand	/destinations/thailand	
● Austria	/destinations/austria					● Malaysia	/destinations/malaysia	
● Denmark	/destinations/denmark					● Singapore	/destinations/singapore	
● Finland	/destinations/finland					● Indonesia	/destinations/indonesia	
						● Australia	/destinations/australia	
						● Japan	/destinations/japan	
						● Korea	/destinations/korea	
						● Brazil	/destinations/brazil	

Note: the guide data set identifies “Switzerland” as the Interlaken, Switzerland destination card; Korea and Japan appear as distinct guide pages alongside Seoul and Tokyo. Destinations may surface as country, city or region concepts in the catalogue.

What is included in this detailed presentation

Use this page as a quick audit trail: the deck documents every named visitor-facing page route, all repeating home sections, every destination route family, community states and the guarded operations map.

✓ Home sections	Hero · How it Works · Destinations · Gallery · Pricing · FAQ · Founder · Contact
✓ Content pages	Audience · Collection · Founder · Travel Feeds · Feedback
✓ Service pages	Help Centre · Privacy Policy · Terms & Condition
✓ Destination guides	Reusable template + live / planning layers + all 33 routes
✓ Community pages	Connect · Registration · Profile · Message Book · Callback
✓ Operations	Admin sign-in, volunteer application, guarded admin module map
✓ Shared system	Header / footer, routes, cross-links, design tokens and responsive behavior

REVIEW LIMIT

Live data, external sources and identity-provider interactions were documented from their intended interface / route design. The PDF does not attempt to authenticate, submit personal details, or access protected admin records.

COMPLETE ROUTE + SECTION TOUR

A platform built around dream destinations, then real community.

The experience starts with “where have you never been?” and expands into deeper destination knowledge, collection proof, direct support, member participation and safeguarded operations.
